

U.S. Patent Application Serial No. 10/646,922
Response to OA dated October 29, 2008

REMARKS

Claim 2 is amended in order to more particularly point out, and distinctly claim the subject matter which the Applicants regard as their invention. The Applicants respectfully submit that no new matter has been added. It is believed that this Amendment is fully responsive to the Office Action dated October 29, 2008.

In the Office Action, Claim 2 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Kweon et al. (U.S. Patent No. 6,925,313) in view of the cited prior art (document JP 59-78654. Reconsideration and removal of this rejection are respectfully requested in view of the present amendment to Claim 2 and the following remarks.

In the device of Kweon et al., as best shown in FIG. 3, within alleged frame (24) there are arranged a light guide plate (23) and a printed circuit board (25) which are between alleged electronic circuit chips on alleged chip mount areas. Although the electronic circuit chips may oppose chip mount areas that are free of electronic circuit chips, it is impossible for the electronic circuit chips to be meshing with the chip mount areas that are free of electronic circuit chips because the light guide plate (23) and the printed circuit board (25) prevent such meshing.

Claim 2 is presently amended in order to more clearly define the claimed invention so as to distinguish over Kweon et al. and JP '654,. Support for the amendment is found at least in FIG. 7.

In view of the amendments to Claim 2, and the above remarks, removal of this rejection is respectfully requested.
